DST Series Gas-Fired, Low Intensity Patio Heater

The DST Series patio heater combines application flexibility with chic, modern design. This low intensity, tube heater is specifically designed for comfort, reliability and ease of installation. The DST Series is sure to deliver the desired amount of warmth across a vast number of hard to heat applications.

Features & Benefits

Smart LED Self-Diagnostics

- Service issues can be identified using the LED diagnostic light.

BTU Selector: Two heaters in one (high/low fire)

- Application flexibility – always the right fit.
- Documented fuel savings.

30 Linear Feet of Radiant Tube

The most radiant surface area of any 10-ft. radiant patio heater available!

- Low exhaust temperatures.
- Increased efficiency – more heat transferred to the space.
- Even heat distribution & increased heat output.

Highly Decorative, Stainless Steel Housing

- Low top clearance.
- More heat directed to the floor.
- Increased durability

Unified Component Panel with Easy Access

All heater components on one easily accessed/removed panel

- Easily serviced.
- Decrease heater down time.

3/4" Modular Decorative Grille

- Easily removed for cleaning and servicing.
- Large openings enhances radiant output.
